

MANDARIN FAST TRACK PROGRAMME

Building Strong Mandarin Language Foundations for Primary School Success

Who is it for?

Children aged 5 years old

Why Join?

The Mandarin Fast Track Programme provides additional learning opportunities beyond the regular curriculum, helping children to strengthen their languages skills and build confidence in speaking, reading and writing in Mandarin.

The programme emphasises regular practice, review and retrieval of learning, enabling children to remember what they have learnt, apply it in new situations and build lasting language confidence.

Children will:

- ✓ Recognise and understand more Chinese characters
- ✓ Expand their vocabulary and word-building skills
- ✓ Learn common Chinese radicals
- ✓ Develop sentence construction and writing skills
- ✓ Improve reading comprehension and oral communication
- ✓ Build confidence in using Chinese in everyday situations
- ✓ Prepare for a smoother transition to Primary School

Our Approach

Through interactive games, guided reading, structured language activities and meaningful practice, children develop their Mandarin language skills in a supportive and engaging learning environment.

Children are given regular opportunities to revisit and reinforce previously learnt knowledge through repeated exposure, guided practice and purposeful language use. This enables them to recall, apply and adapt their learning in different contexts, strengthening both understanding and long-term retention.

Programme Outcome

Children will develop strong foundations in Mandarin and greater confidence in communicating effectively in both school and everyday settings. Through consistent practice and retrieval, learning becomes secure, meaningful and transferable, preparing children for continued success in Primary School.

AGE	PERIOD	SESSION	DURATION	TOTAL SESSIONS
5yo & 6yo	3 Aug - 11 Dec	2 sessions (per week)	1 HOUR (per session)	34 SESSIONS
